About us

The JONEX company was established in 1988. From the very beginning to be able to offer customers a comprehensive range of products necessary to perform each electrical installation. From the beginning of its activity company was manufacturing primarily sockets, extensions and mounting boxes. With the development of companies to a solid offer enrolled new products, including splitters, surge protection extension cords, garden extension cords, etc.

Currently, thanks to hard work and many years of experience, the products offered by JONEX are highly appreciated and recognized not only by domestic but also foreign customers. Our main goal is constant readiness to meet the needs of current and future customers. We achieve this through continuous development and modernization of the machine park, as well as continuous training and development of personnel qualifications. Our main customers in Poland are electrical wholesalers, strategic investors, purchasing groups and supermarket chains. Sales markets are successively expanded to include new foreign contractors, including in Russia, Slovakia, the Czech Republic, Ukraine, Germany and many more.

The company operates on its own site with an area of approximately 5700 m². To meet all production processes and meet your needs, we have two halls and three warehouses with a total area of over 3500 m². Deliveries of goods are carried out with our own transport or through specialized courier companies. The machine park includes, among others specialized machines for thermoplastic and mechanical processing as well as assembly stations and devices. The machine park is successively supplemented with new devices, new technologies necessary for the production of new types of products. Thanks to continuous development and a constantly growing group of recipients, we constantly undertake new challenges and implement new projects. In addition, we continuously invest in new solutions and technologies.

JONEX

What we do?

As a manufacturer, JONEX offers services in the field of injection of thermoplastic materials, production of electric harnesses, and assembly of components.

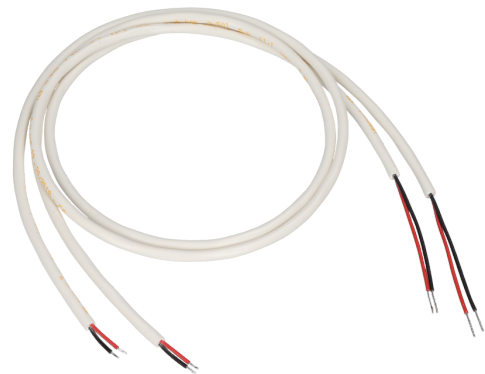

INJECTION MACHINES

- horizontal and vertical injection molding machines
- weight up to 500g
- clamping force up to 200 tons
- the possibility of producing the mold

HARNESS PRODUCTION:

- cutting, stripping, crimping
- housing assembly
- process monitoring
- UL traceability program

ASSEMBLING:

- assembling components
- assembly of electronic components
- work on the entrusted material
- confection and packaging

CERTIFICATION AND NORMS

CERTIFICATE VDE, UL, BBJ

OUR PRODUCTS ARE CERTIFIED
BY WELL-KNOWN
LABORATORIES ALL OVER THE
WORLD, WHICH CONFIRMS THE
QUALITY OF OUR PRODUCTS

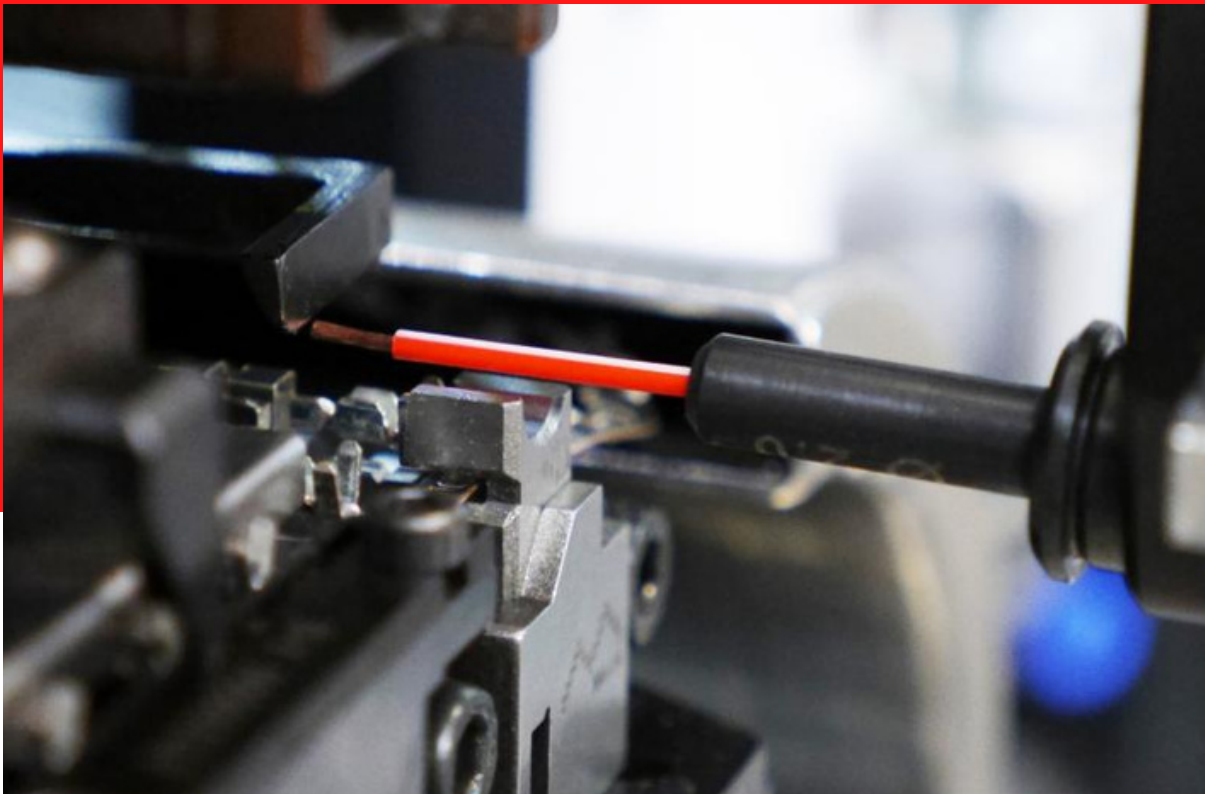

VDE

IPC/WHMA-A-620

WHEN MAKING CABLE HARNESSSES,
WE RELY ON THE IPC / WHMA-A-
620 STANDARD. THIS GIVES OUR
CUSTOMERS A GUARANTEE OF HIGH
QUALITY AND RELIABILITY.

A bit more about Harnesses

We make cable harnesses according to the needs and specifications of the customer, while giving priority to the issue of ensuring our product of the highest quality.

Our company are looking for optimal solutions that meet customer expectations in many aspects: quality, easy assembly or trouble-free operation at the end user. We always act in relation to the needs specified by the client.

Jonex guarantee the highest quality of our products - we perform key production processes with the use of machines from renowned Italian and German manufacturers such as Wirmec, Schleuninger, Samec.

We provide a stable and repeatable serial production process: for each bundle we create dedicated tools in our tool shop and we try to improve the entire process as much as possible so as to minimize the time and costs of assembly. Each project is treated individually.

JONEX

JONEX

Thank you

We are looking forward to work with you

TEAM WORK

Today's industry places very high demands on the electrical connections between control devices and end elements.

Our team strive for perfection in organisation and monitoring of all stages of each project, from planning through production to the final control. Properly managed processes ensure high quality of our products.
